

SentinelAI Enterprise Security Report

Report: Latest Upload Report

Generated: 2026-07-03 07:33:24 UTC

Executive Summary

The enterprise maintains a strong security posture with a Security Score of 100 and an overall LOW risk level. Currently, there is 1 identified risk, categorized as Low severity. There are no Critical, High, or Medium severity risks requiring immediate attention, and zero risks have been resolved within this period. The environment comprises 2 identities, consisting of 1 user and 1 role, with zero service accounts identified. No dormant or privileged identities were found. A top finding indicates a low-severity event where the identity 'arn:aws:iam::503511483994:root' accessed the sensitive service 'iam.amazonaws.com' once. Security graph analysis reveals 3 total nodes and 2 relationships within the cloud environment. Crucially, zero attack paths have been identified, indicating no exploitable routes to sensitive assets. There is no single most connected identity currently highlighted by the analysis.
