

SentinelAI Enterprise Security Report

Report: Latest Upload Report

Generated: 2026-07-03 09:14:08 UTC

Executive Summary

The current security posture reflects a strong position with a Security Score of 100, resulting in an overall LOW risk rating. No Critical, High, or Medium severity risks were identified. A total of one low-severity finding is currently open, with no resolved findings. The single identified low-severity finding pertains to the AWS root account (arn:aws:iam::503511483994:root) accessing a sensitive IAM service once. The environment contains a total of one identity, identified as an IAM User. There are no roles or service accounts present. No dormant or privileged identities were identified. Analysis of the cloud environment graph shows 4 total nodes and 3 relationships. Importantly, no attack paths were identified within the current infrastructure. The most connected identity data is not available.
