

SentinelAI Enterprise Security Report

Report: Latest Upload Report

Generated: 2026-07-05 14:37:18 UTC

Executive Summary

The enterprise currently maintains a security score of 100, reflecting a LOW overall risk posture. The environment exhibits no Critical, High, or Medium severity risks. A single Low severity finding is present, and no risks have been resolved within the reporting period. The sole finding is a Low severity risk analytics alert: the identity `arn:aws:iam::503511483994:root` accessed the sensitive service `iam.amazonaws.com` 2 times. This activity is attributed to an IAMUser. The environment contains 1 total identity, specifically 1 IAM user. There are no roles or service accounts identified. Furthermore, there are no dormant or privileged identities detected at this time. Our security graph analysis indicates a landscape of 5 total nodes and 4 relationships. Critically, no attack paths were identified within the environment, and no specific identity was flagged as the most connected.
