

SentinelAI Enterprise Security Report

Report: Latest Upload Report

Generated: 2026-07-05 15:35:27 UTC

Executive Summary

The current cloud security posture is assessed as LOW risk, with a security score of 100. There are no critical, high, or medium severity risks detected. The report identifies a total of 2 low-severity risks, with 0 resolved findings. The key low-severity findings involve sensitive service access to iam.amazonaws.com. Specifically, the assumed role arn:aws:sts::842615903781:assumed-role/Prod-CICD-Execution-Role/ci-pipeline-session accessed this service once, and the root user arn:aws:iam::503511483994:root accessed it twice. A total of 2 identities are actively monitored, comprising 1 user and 1 role. There are no service accounts, dormant identities, or privileged identities identified in the current scope. The environment currently shows no identified attack paths. The security graph analysis processed 6 nodes and 4 relationships. Data for the most connected identity is not available in this report.

Overall Posture

Security Score: 100/100
