

SentinelAI Enterprise Security Report

Report: Latest Upload Report

Generated: 2026-07-05 16:00:18 UTC

Executive Summary

The current security posture indicates an overall LOW risk level with a security score of 100. A total of 2 risks were identified, all classified as Low severity. There are no Critical, High, or Medium risks, and zero risks have been resolved. The top findings include two instances of sensitive IAM service access by distinct identities, specifically an assumed role and a root user. The environment comprises 2 identities, consisting of 1 user and 1 role. There are no service accounts, dormant identities, or privileged identities detected. The environment's security graph consists of 6 nodes and 4 relationships. No attack paths were identified. There is no most connected identity in the current analysis.

Overall Posture

Security Score: 100/100
Overall Risk: LOW
